Dear Sir / Madame

I am writing on behalf of Parkinson Harness Technology Ltd in support of the Boston City Status bid.

As a manufacturing business based in Boston (in various guises) since 1973 we feel that becoming a city would bring significant economic and emotional benefits to Boston, helping to change the perception of the area to that of an urban centre creating opportunity, resilience and wellbeing through greater economic participation and productivity.

Boston has diverse cultural influences due to its rich history which is embraced through the Port, the Guildhall and the stature of the centrally located church of St. Botolph's (Boston Stump) one of the largest parish Churches in England. City status would add significant credibility of Boston and assist the development of a modern cultural identity on top of this fantastic historical legacy.

City Status provides a unique opportunity to market and develop its distinct character and deliver a city that is a worthy of the title.

I wish you all the success in your submission.

Yours sincerely

David M Earnshaw

Managing Director
